

Introduction:

This training course on Ensuring Compliance and Process Enhancements for Establishment Inspections offers in-depth knowledge and practical skills focused on improving inspection processes within sector establishments. The primary goal is to guarantee adherence to the regulations and guidelines set forth by the Social Insurance Institution.

Participants will learn how to identify opportunities for business process improvements following inspection activities. Recognizing these improvements is essential when analyzing establishment inspection reports. The course covers effective inspection techniques, detection of non-compliance, and implementation of corrective measures to strengthen overall compliance and align with labor laws.

Through careful examination of inspection outcomes, organizations can adopt process improvements to optimize operations and maintain regulatory compliance. Leading such initiatives involves a strategic approach that includes setting priorities, defining clear objectives, and ensuring all team members understand their roles in promoting continuous enhancement of workplace practices.

Intended Audience:

- Compliance Officers
 - Social Insurance Inspectors
 - Quality Assurance Managers
 - Human Resources Professionals
 - Managers and Supervisors in the Private Sector
 - Legal Advisors specializing in Labor and Social Insurance Law
-
